

RCTC Report
March 2007

RCTC

Term IV began this week. There are 21 classes operating with Welding, Electric Motor Control, HVAC, and the Medical Technologies being our most popular this term.

We participated at the Erie Careers Job Fair on March 15 at the Intermodal Transportation Building from 11:00 to 7:00. We were able to share information with many people about our adult training programs, job opportunities, and career development program, (NC/NO).

We have applied to the Veterans Administration for approval as a training site for those wishing to use the G.I. Bill benefit.

New Choices/ New Options

Mary Ellen will be attending the New Choices / New Options statewide in-service held in State College on March 22 and 23.

We have scheduled an evening class to be held at ECTS from April 17 to May 31. This class will meet three evenings a week over a seven week period from 6:00 to 8:30 p.m. We are hoping for a good turnout.

Leadership Day, an annual event sponsored by PA Women Work, will take place in Harrisburg on Monday, April 16. This event brings together NC/NO project directors and participants from around the state for a day of motivation, inspiration, and leadership training that includes a visit to the Capitol and legislative offices.
