

Supervisors of Instructional Support Services Report
October 2006
Patrick Holland and Jan Kennerknecht

Articulation Agreements

Our newest articulation agreement gives our Early Childhood Education (ECE) graduates six college credits upon enrollment in Gannon University ECE programs. A copy of the agreement is posted in the supplemental information section. We now have 69 agreements with 32 post-secondary institutions.

Curriculum Development

Over the past two years, we have utilized a nationally recognized, in-depth process for "developing a curriculum" (DACUM) as we considered new programs in Natural Resources and Environmental Sciences, Diesel Technology and most recently, the updating of the Tool & Die program. In an effort to keep all of our programs relevant to the needs of business and industry, we have developed a three-year cycle for updating, using the DACUM process. We will be contacting a facilitator to coordinate curriculum development workshops for six of our programs this year.
