RE: Facilities Feasibility Study Proposal

Dear Dr. Jackson:

We are pleased to provide a proposal for a Facilities Feasibility Study for your proposed renovations and/or additions Campus.

Our Facilities Feasibility Study would include an in-depth analysis of each facilities physical condition and systems including architectural, mechanical, plumbing, electrical, and networking; a floor plan and site plan of each building; ADA Accessibility recommendations for improvement; statement of energy efficiency and recommendations for improvement.

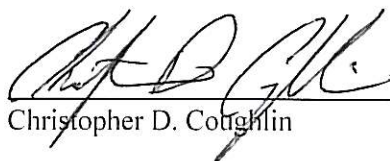

We would also provide an analysis of each buildings capacity as it relates to the educational program and if each building provides the educational spaces dictated by that educational program.

Our Feasibility Study will be performed by Registered Architects and Registered Engineers. Our Consulting Engineers are Tower Engineering, Inc. from Pittsburgh for all Mechanical, Plumbing and Electrical and Acorn Engineering from Pittsburgh for the Networking Computer Technology Systems analysis.

Our fee for this proposed Feasibility Study as described will be five thousand dollars (\$5,000.00). Should we be selected to perform the Architectural Services for implementing the improvements derived from the Feasibility Study, full credit of this fee will be applied toward the Architectural Fee of 6%.

Respectfully submitted,

HALLGREN RESTIFO LOOP & COUGHLIN
