

Joint Operating Committee Meeting September 2009 School District Report

1. Strategic Initiatives—2009-2010

Following an administrative retreat, the technical school has developed priority action plans for the following areas:

- a) Student Guidance & Advisement
- b) Occupational Competency Testing
- c) Student Information System Data Controls

Other campus priorities will be addressed through ad hoc committees. Those priorities include:

- a) A Standardized Grading System
- b) Curriculum Scope and Sequence
- c) Internal Communications
- d) Recycling

2. Opening Enrollment

Projected enrollments for the start of the 2009-2010 school year are down slightly from the previous year. First day attendance is expected to be 773 students, compared to 787 last year. Enrollments in the Facilities Maintenance Technologies and Tool & Die programs are especially encouraging. These programs have 'double-digit' first-year enrollments. Both programs have recently faced 'single-digit' first year enrollments.

3. Equipment Addition

The operating committee authorized the purchase of an industrial wiring training system. The investment of \$48,504 enhances the training capabilities in our Electrical Engineering program and the adult education classes offered by the Regional Career & Technical Center.
