

## **RCTC Report August 2009**

### **RCTC**

Registration is open for Term I. Classes begin on September 8. We have advertised in the Erie Times-News, three community newspapers, and the Erie Chamber and Manufacturer's Association magazines. We have also sent mailers listing our courses to a few thousand local business and industries.

Training bids were recently submitted to the Northwest Industrial Resource Center (NWIRC) for G Code CNC and PLC customized training.

### **New Choices/ New Options**

The New Choices program is currently on hold, pending the outcome of the PA State Budget. We continue receiving calls about the program; explaining the situation; and placing people on a waiting list. Also, there are a number of graduates from last year's programs needing tuition assistance to continue their training that we have been unable to assist.
