Alteration and/or Curtailment of Programs**24 P.S. §11-1124****DATE OF ISSUE:** July 1, 2002**DATE OF REVIEW:** July 1, 2009**PURPOSE**

Section 1124 of the School Code provides that: Any board of school directors may suspend the necessary number of professional employees, for any of the causes herein enumerated:

- (1) Substantial decrease in pupil enrollment in the school district;
- (2) curtailment or alteration of the educational program on recommendation of the superintendent, concurred in by the board of school directors, approved by the Department of Public Instruction, as a result of substantial decline in class or course enrollments or to conform with standards of organization or educational activities required by law or recommended by the Department of Public Instruction

PROCEDURES

The Pennsylvania Department of Education will review requests for curtailment or alteration of the educational program of a school district using the following criteria:

1. The Department will approve a school district's request to curtail or alter an educational program if the district establishes that the curtailment or alteration is the result of a substantial decline in class or course enrollments. Generally, to establish that the curtailment or alteration is the result of a substantial decline in class or course enrollments, the school district must submit enrollment data, certified by the district Superintendent, which demonstrates the following:
 - a. that enrollment in the class or course has decreased at least 20% from the school year five years prior; or
 - b. that enrollment for the class or course is less than ten students.
2. The Department will approve a school district's request to curtail or alter an educational program if the district establishes that the curtailment or alteration is necessary to conform with standards of organization. Generally, to establish that a curtailment or alteration is necessary to conform with standards of organization, the school district, through information certified by the district Superintendent, must demonstrate that the requested curtailment or alteration will effect a change in the school or school district's organization or curriculum that results in a more effective educational program.
3. The Department will approve a school district's request to curtail or alter an educational program if the district establishes that the curtailment or alteration is necessary to conform with educational activities recommended by the Department. To establish that a curtailment or alteration is necessary to conform with educational activities recommended by the Department, the school district, through information certified by the district superintendent, must identify the specific department recommendation that serves as the basis for the curtailment or alteration. In determining whether to approve the curtailment or alteration, the department reserves the right to modify or withdraw any recommendation regarding educational activities that was previously issued.
4. The Department will approve a school district's request to curtail or alter an educational program if the district establishes that the curtailment or alteration is necessary to conform with educational activities required by law. To establish that a curtailment or alteration is necessary to conform with educational activities required by law, the school district, through information certified by the district superintendent, must identify the specific law that serves as the basis for the curtailment or alteration.

All requests must include a copy of the Board Action as recorded in the Board minutes as evidence of approval by the school district's board of school directors.

For purposes of this section, certification that the district will remain in compliance with minimum curriculum requirements is not adequate proof that the curtailment or alteration is necessary to conform with educational activities required by law.

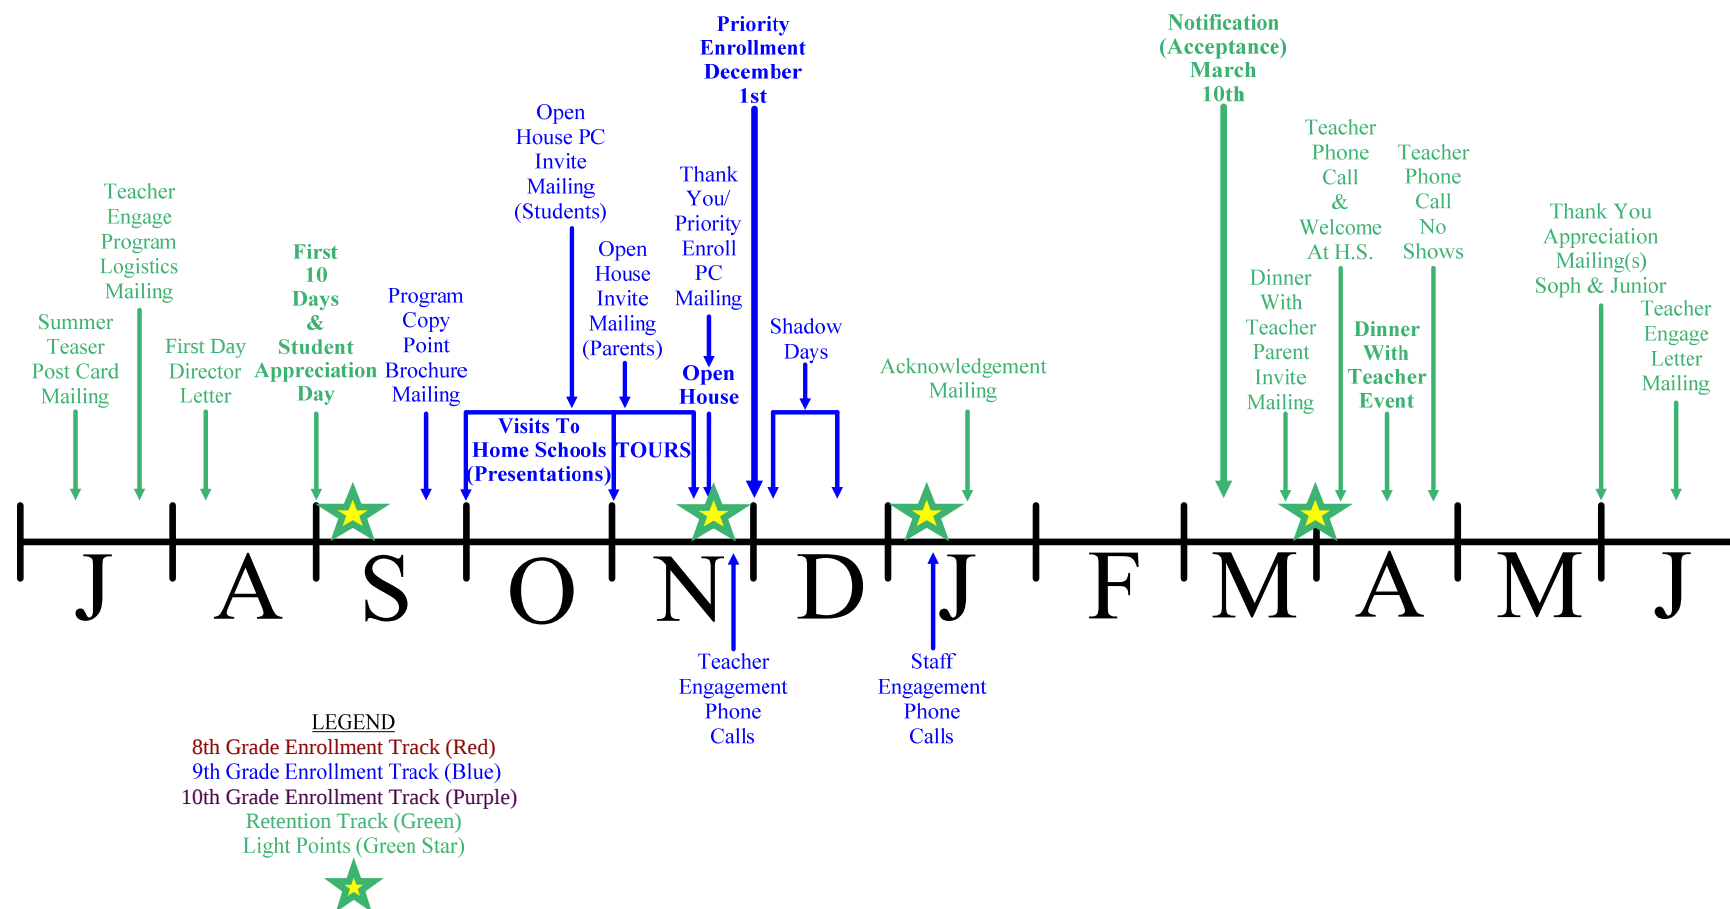

Administrative Procedure
Section: **Programs**
Number: **126**
Title: **Enrollment Review**
Adopted: **December 19, 2002**
Revised:

During the month of April, tentative enrollment numbers will be presented at the regularly scheduled meetings of the Professional Advisory Council and Joint Operating Committee.

During the month of May, the Professional Advisory Council will make recommendations to the Joint Operating Committee on the status of any program with fewer than 10 students per session. The recommendations may include closing the program, reducing the program to part-time status or maintaining the program at fulltime status.
