

May Technology Board Report

May 21, 2010

Desktop Systems

Worked on hardware quotes for 2010-2011 planned technology improvements.

Worked on Eagles Nest Audio/Video setup for a seamless connection to the in-house audio system.

Completed Rockwell Automation software Upgrade for EET Instructor's PC, this is an annual upgrade/relicense.

Addressed some performance issues with student logons related to Active Directory Group Policy settings.

Re-visited our digital classrooms and made improvements with their audio abilities; as the methods for delivering multimedia in our digital classrooms this year exploded.

Network and Server Systems

Evaluating this years' network performance to identify opportunities for improvement for implementation over the summer.

Evaluated Backup Server to determine its capacity for planned 2010-2011 improvements.

Working on database integrations for next school year to improve the real-time update of enrollment between our student servicing databases (ie. Student Logon, Cafeteria Food Sales, etc...), and our student information management system.

Technology Staff

Greg Nye started on March 29th in the Technology Substitute position, was a wonderful fit for our needs, but unfortunately for us has found permanent employment and will be leaving us before the summer. I appreciate all the hard work Greg did for us and I am very happy for him.

Met with Andy Hough, with Natalie Fatica, to discuss status. Natalie will have information in her HR report.

Interviewed several students and intern candidates for our Summer/Seasonal help work in Technology. HR will have a recommendation on our collective behalf.
