

Technology Board Report

Desktop Systems

We have received the SAS Software for Computer Programming; and are beginning the process of evaluating the deployment process.

We have submitted the Purchase Order for the AutoDesk license renewal for Drafting and Design.

We have purchased four iPad's for the Transition Center.

We have submitted the computer rotation plan proposal to Dell for pricing; and will soon place the Purchase Order

Applications and Database

We've made a few minor changes in the District Portal to support some exceptional enrollment situations that were not being reflected in the portal accurately, thanks to the districts observations.

Network and Server Systems

We have ordered and received a new Server to facilitate converging the majority of our Servers to Virtualization, which will offer more flexibility, performance, and reliability while consuming less energy and requiring less cooling.

We have renewed our Microsoft Campus Agreement to maintain our Windows, Server, Email, Database, and Office licensing.

We are successfully migrated to Time Warner Cable's telephone services and internet services. There are a few fairly minor technical issues still being worked on, that we should be able to resolve soon. I am concerned that one of the issues *may* require us to upgrade the software on our PBX system, in order to be compatible with how Time Warner does things.

Staff

I want to thank Chuck Ferris for his service. He did very well for us. I am sorry to see him go, but we are thrilled for him and his new opportunity.

The summer help will help get us through the summers work.
