

## Technology Board Report

### **Desktop Systems**

Updated the video driver on the all of our Vostro 3550 laptops, a total of 64. These systems developed a conflict after Internet Explorer 10 was released.

Working on the 5 MacBook Pro's for Art and Design that were purchased with Perkins funds last month.

Corrected license issue for Final Cut Pro, and Aperture 3 in ADS. We had originally keyed the same key on all computers, which resulted in license conflicts when two computers launched the application. We had to install unique license keys on each system.

Scrubbed the Hard Drives, then re-Installed the Dell OEM Factory Image onto the 62 PC's proposed for surplus, so they may be sold.

### **Help Desk** *(last 30 days)*

| <b>Closed</b> | <b>New</b> | <b>Carryover</b> |
|---------------|------------|------------------|
| 40            | 19         | 42               |

### **Applications and Database**

Updated District Portal to include Transition Center Membership data.

Created reports using the Admissions Database, which houses a record for every freshmen from every participating district every year, which are similar to PDE-2549 and PDE-4062 for District ADM and VADM calculations.

Worked with Infinite Campus to iron out a proposal for cost estimates for consideration with Grant Funds.

### **Network and Server Systems**

Ran network cables to the Digital Display TV's. We're hoping to streamline the updates to these signs with a network connection.
