Erie County Technical School

Jan Kennerknecht, M.Ed.

Supervisor of Instructional Support Services
8500 Oliver Road
Erie, PA 16509

March 4, 2014

Dear Ms. Kennerknecht,

On behalf of the Electronics Technicians Association, International® (ETA), I am pleased to inform you that the Electronics course offered by Erie County Technical School meets the objectives for the ETA International Basic Electronics certification categories for which you have applied for renewal.

The renewal of this course has qualified your program for ETA certification. The ETA International certification examinations may now be administered as a part of this training offered by Erie County Technical School.

You are hereby authorized and should reproduce the ETA International logos, corresponding to the approved training courses. Use in correlation with literature covers, classroom/training promotional materials, website or advertising for this training. Such identification must cover only the certification categories for which the approved training is designed.

Please be aware that all ETA proprietary information that is not known to the public (such as testing material) is considered as Confidential Information and shall remain exclusively the property of ETA and shall only be used for the purpose(s) permitted by ETA.

Should any of the course curricula be revised in any significant manner, ETA requires that the updated versions be submitted for reconsideration. This approval is valid for four years, at which time it may be reviewed and renewed.

Erie County Technical School has met the necessary standards required for training and testing for the following ETA certifications:

Certified Student Electronics Technician Associate Certified Electronics Technician Electronic Modules 1-5

Completing all five Electronic Modules within a two-year period will earn the student an Associate Certified Electronics Technician certification.

We appreciate the opportunity to review and approve the courses that Erie County Technical School has submitted in this category. ETA extends our congratulations to the administrators and staff for the implementation of this program.

Thank You,

Teresa J. Maher, CSS
