

Technology Board Report

Desktop Systems

Installed network cabling in the Computer Networking lab in the old Plastics area of Precision Machining.

Installed a remote access system for the maintenance department to monitor a legacy outdoor camera to track weather conditions from their smartphones.

Purchased Video Matrix to improve our projection abilities in the cafeteria. Will be installing over the course of the next few months.

Applications and Database

Reviewed Adobe Creative Cloud options, and opened dialogue with peers' schools regarding the impacts on curriculum, and budget. Attended two webinars with Adobe Licensing specialists, and proposed options to Danielle Wilber, Art and Design Instructor.

Collaborated with Michael Miller, Computer Networking Instructor to identify adequate equipment for the Computer Networking Lab project.

Continuing support for our database applications and their integration with Infinite Campus real time data, attempting to model SchoolDESX processes.

Network and Server Systems

Completed the migration to Exchange 2013. In to process of decommissioning the old Exchange 2007 server instances.
