

1	I miss some time next year with practice right after school
2	if i had ects in afternoon this year then yes it would take 10 mins off my practice
3	I loved doing broadway dinner last year, however since i enrolled in Tech i have not been able to join it.
4	next year I will be in pm tech and because my school gets out at 2:20 practice for me is right after school and I will be late for practice
5	As of this year it does not interfere too badly but next year being a pm student it will interfere with pep rallies and band practices as well as my job possibly.
6	Only the time when it comes to pep rallies. The color guard performs at pep rallies and I am in color guard but I am at tech during that time.
7	I can't go to Library Literacy Club meetings very often because they take place during tutorial, which i am not at school for.
9	Once I become a pm student I will not be able to attend some soccer games because I will not get back in time.
10	Fairview bowling
11	because tech takes away our intervention. Sometimes after missing a day of school I need intervention to at least go pick up my homework or anything I missed in any classes and I cant do that with tech
12	it will interfere with soccer
13	It has given me knowledge about welding and helped me at the robotics program
14	Because I go to tech, I am not at our homeschool during activity period , where we are able to participate in extra curricular activities during school hours
15	sometimes when I get out of practice or the games its really late and Im really tired. so then I get ready for school the next day and go to bed. therefore I don't get my homework done sometimes.
16	After school soccer, will become a problem I believe because we have to leave early for games a lot during the season and General McLane makes you go to PM tech in 11th grade. So that will most likely become a major problem.
17	Sometimes we have morning practices and I cannot attend them because the tech bus leaves before practice is over. Also sometimes we have day activities for PBIS or Lead and Seed that I have to choose which to attend that day.
18	being in tech devolopes interest for class, I do custom or self designs on my freetime.
19	All of the homeroom meetings are missed as I am at ECTS, which will change next year as I will have a homeroom at my home school.
20	I ski and sometimes I have skipped going skiing because of tech work.
21	yes because I work on cars and trucks after school
22	I can't really do anything fun. The class is draining, the drama is excessive and follows itself out of the classroom.
24	doing work
25	I am always late for after-school football practices and weight room lifting privileges , and from additional honors programs offered at Girard. I was unable to partake in RCI courses and some AP courses at Girard because of tech, and I was also told it was impossible for me to be a member of Girard's National Honor's Society (NHS) and the National Technical Honor's Society (NTHS) at the same time. Luckily, I was able to prove this wrong and I am currently a member of both groups, but because of tech I miss almost all Girard NHS meetings, and I need to have special arrangements made to make up for all the information I miss. I also have to do the same for the Positive Behavior In Schools (PBIS) group that I am a member of. I was also never given any SAT information at my home school because since I went to tech I was pre-labeled, and it was assumed to be unnecessary that I took the SAT's because of my choice to come here, while all my other peers received all sorts of information about SAT's and why they (meaning people who do not attend tech) should take them.
26	im late for swimming practice
27	im late to them
28	Im always late to football because of the time it takes me to get back to the home school
29	I can not go to work and have to work around it because it takes to long to get back to Harborcreek
30	Being in the PM class of ECTS made it so that when I got back to Northwestern I missed a good hour and a half of band practice every day.
