Letters of Support for Career Street EITC program renewal

Letter templates requesting the districts' ongoing support of the Career Street program will be sent out in the next few days to each Career Street member school district. With the EITC program renewal packet, we must request each district to pledge their support of the Career Street program's services in the coming year. These letters are required to submit our renewal packet in early May to allow the Foundation to secure a place on the initial 2016-2017 approved list of Educational Improvement Organizations that the DCED publishes in early July.
