

Manufacturing Summer Camp 2016

The 2016 Summer Manufacturing Camp would like to thank you for your sponsorship.

We appreciate the wonderful opportunity for us to learn about manufacturing and what it entails as a career. We learned what it takes to be a responsible employee. We learned the benefits of a manufacturing career. We learned new skills from CAM, CNC, Laser Cutting, Programming and Welding.

We would like to thank those who made the subsidy for our camp experience possible.

Camp was an incredibly enriching place, we were able to experience a sense of community and belonging. The friendships we made there are invaluable.

Without the help of the subsidy, we would have missed out on an incredible experience.

We give you a multitude of thanks. We have gained so much from having the opportunity to attend the Summer Manufacturing Camp. We had an amazing time and such a positive camp experience. Without your support, we would not have the people who have inspired us in so many ways.

Many thanks from Class of 2016 Summer Manufacturing Camp.
