

Technology Board Report

Desktop Systems

Re-Imaged Graphics and Computer Programming computers for re-deployment in new areas.

Installed and deployed new computers in Graphics and Computer Programming labs.

Developed new Windows 10 installation images for new hardware, and existing hardware.

Finalized plans for Video Wall in Eagles Nest.

Worked with vendors to secure contract quotes for printers for Graphics and Art and Design.

Repaired Automotive Technologies Rolling TV.

Applications and Database

Working with Pam Lasher and Joe Tarasovitch to complete Infinite Campus data elements in preparation for State Reporting, and the launch of next school year enrollments.

Network and Server Systems

Network Segmentation plan was been laid out, and should be deployed in July.

Working with Vendors to secure storage solution to move backups out of the production server easing the storage burden in the production server, while increasing recovery capabilities. Additionally, considering options for off-site storage replication of the backups.

Renewing Maintenance and Software support and licenses.

Updated Deployment Server with compatibility with the newly purchased hardware.

Worked with Maintenance to identify optimal solutions for server room, and copier room cooling. Both have failed units at this point, and the portable unit we have been using in the Server room has proven incapable on 90+ degree evenings and weekends when the surrounding office space A/C's are not running.

Administrative

Participated in Annual Summer Administrative Retreat
