Technology Board Report

Desktop Systems

Installed a camera monitoring station in the Facilities Manager's office. After migrating to the new camera recording systems last summer, providing for live monitoring in the office required a new approach.

Applications and Database

Created some reports for HR to support the CRDC data collection criteria.

Continue to refine the aggregation of Copier Usage information and Toner allocations that we report to the business office.

Completed some corrections to PIMS.

Network and Server Systems

Working summer plans for network cabling. We have several initiatives with demands for network cabling, that we are strategically working with our current documentation to leverage as much existing cabling as possible.

Installed new network management cards in all APC UPS systems with new server software to improve our visibility and analytics with our battery systems.

Working in Microsoft Office365 to determine summer plans for rollout and migration of things from our on-Premise offerings to their Cloud Infrastructure.

Working on a VPN connection to Career Street Director's residence to improve her work from home abilities.
