

Supervisors of Instructional Support Services Report

March 2017

Sandy Carr and Patrick Holland

Curriculum Development

DACUM Workshop - a DACUM workshop was held for our Computer Networking program on Thursday, March 23rd.

Ethics Symposium - On March 7, 2017, Sandy and Remle Moyak chaperoned a group of students to Mercyhurst University for the Ethics Symposium sponsored by the Rotary Club of Erie. Chaperones participated in a seminar to learn about Appreciate Inquiry, a new strategy for problem solving and critical thinking skills. The Appreciate Inquiry model allows an individual or team focus on what you do best and push forward to make it better.

Special Education

Instructional Aides Monthly Meeting - This month Sandy and Pat met with our instructional aides to discuss some ways to better organize the supplemental materials that are created and used to support our students. These materials include a list of vocabulary terms by topic, study guides, fact sheets, math formulas, etc.

Junior Transition Meetings – Pat and Sandy participated in the final round of transition meetings for our junior students. Our goal is to identify those students who may require additional supports after high school graduation.

Term III will come to a close on Wednesday, March 29. Sandy and Pat are continuing to follow up with our students with disabilities who have low or failing grades either for this term or for the year. In trying to help the students bring the grades up we rely on the direction of our instructors and the direct support of the instructional aides.
