

Technology Board Report

Desktop Systems

Developed specifications and submitted orders for systems for summer rotation.

Working on Digital Signage system, to improve information delivery.

Working with various vendors to conceptualize a long-term approach to replacement of projection with LED TV's.

Assisted Schwaab Co. with repairing the new Digital Plate Maker print processor again. This system has encountered software related issues twice in the year it's been implemented.

Assisted Schwaab Co. with issues we were encountering with the Graphics Copier, which also has had it's share of exceeding outages in it's 5 years on our campus. This time a complete rebuild of it's software engine was performed.

Applications and Database

Working on importing the 2017-2018 sophomore enrollments from the admissions process.

Network and Server Systems

Developing specifications for rolling out new network segmentation, now possible with the new Network equipment implemented over the last two years; which will ease our transition toward supporting BYOD access to printing, presentation mirroring and casting, as well as improve our abilities at the firewall to control internet traffic.

Slowing pushing forward with improvements in our Windows Update infrastructure to better manage patches to Windows 10 and 3rd Party applications.

Administrative

Solicited, collected, and worked with HR to interview summer help candidates.

Completed several PIMS expectations.

Participated in internal ISO Audits.
