

Erie County Technical School
Admission Coordinator Board Report
October 2016

During the month of October ECTS presentations take place in the sending schools. Freshmen are provided information about the opportunities at ECTS and begin the process of exploring by choosing 3 programs to visit in November with their class. Information is presented in small groups at each school. About 45 different groups are addressed throughout the month. The Guidance Counselors have been an integral part in setting up the presentations in each school. I am very appreciative of their help.

Plans are underway for Freshmen to visit during the month of November. About 1500 students will come through ECTS and participate in an activity related to the programs they chose during the presentations. Open House for interested students is November 17 from 4:30 – 6:30 PM. The details of this event are being finalized. A post card invitation will be sent to prospective students and parents. JOC members are included in the mailing and will receive the same information. The Graphic Communications Program is making posters to be displayed in the sending districts.

ECTS was represented at Manufactures' Day earlier in the month. The Instructors from Metal Fabrication, Precision Machining, Drafting and Design, and Electronics provided materials, greeted students, and demonstrated the materials representing their program. The group is eager to participate again next year and has already scheduled meetings to prepare. A thank you goes out to Dr. Jackson for the opportunity to be a part of this day!
