Finance Manager's Report

March 2018

Career Street Website Project

The FuseLab Creative team was on-site for two days to gather information from various focus groups regarding the website project design. Their team seems to be very in-tune with the needs for this website update and it has been a pleasure working with them on their fact finding interviews.

CS The Product Reporting

The financials have been updated to reflect a separate departmental reporting for CS the Product. This will allow for easier tracking of the expenses incurred since the numbers will be reported separately from other Foundation and Career Street expenses.

EITC Funding and Renewal

At the end of March the request for letters of support for the EITC renewal will be sent to the superintendents regarding the Career Street Program. These letters from the superintendents are a required item for the EITC renewal packet which is generally submitted in early May to receive approval for July 1st listing.

Within the past several days, two EITC donations have been received. These activities will be present on the March financials.
