

## **Technology Board Report**

### **PIMS Staff Reports**

PIMS Staff reports have been handled manually in the business office since the inception of PIMS. Employee information has remained limited in Infinite Campus since we adoption in 2014. We believe we can effectively use Infinite Campus to complete our PIMS Staff reports, if we can implement a thorough process. Our interests in having staff ID badges has further increased the demand for thorough information within Infinite Campus, rather than trying to extend the payroll system, or adopting another system for this function.

We have therefore invested in the report writing to facilitate the creation of staff ID badges from Infinite Campus from this effort.

### **ECTS Website**

The ECTS Website direction has been concluded and communicated. At this point the platform and pages are underway with the plan to deploy by the end of April.

### **Server Maintenance**

With the overhaul of our patch management systems, several server software updates have been installed and we continue to monitor the servers for efficiency and conflicts with these updates.

### **TRC Upgrades**

Installed classroom projection TV's in the Transition Center; along with faculty tablet upgrades and student laptop upgrades per the upgrade plan collaborated with the Transition Center supervisor, Lesa Scalise.

### **Network**

We have returned to the wireless network expansion project deploying the access point devices that were purchased with our e-Rate Category 2 funding last fall.

### **Cameras**

We have updated several of our closed circuit cameras and added a few more; this has been an ongoing project.
