

Technology Board Report

Video Conference Room

Investigating solutions to extend video conferencing in our conference rooms. Currently they lack webcams and microphones, and simple solutions are not very effective in large group spaces like this.

Room 18 Desktop Computers

Room 18 has been refreshed with the computers that were upgraded this past summer.

Cafeteria Sound System

Cafeteria Sound system was having some very odd issues with certain audio types. Fact Audio came in and resolved the issue temporarily. However, the main amplifier does need to be replaced. It is under warranty and Fact Audio is handling all of that.

PIMS

Continue to work with PDE representatives to determine the necessary reporting for Free/Reduced lunch accountability with our students in absence of a National School Lunch Program. They continue to believe we have to collect and report it; however, they are unable to identify the data dependency for it.

District Portal

Updated the District Portal to reflect Free/Reduced status so that if we ask the districts for it, they are easily able to reconcile it.

ECTS Website

Teams will begin meeting this month to discuss the landscape of our website, and the improvements we should make. The current website was launched in 2014, and it is time to renovate some of its content and flow, as well as better integrate access to our expanse of web applications for our parents, students, faculty and partners.
