

Technology Board Report

Infinite Campus Reports

After the server upgrade, some reports needed to be repaired due to new file locations.

ECTS Website

The ECTS Website is still in development. Other priorities have distracted this project.

Teacher Device Pilot Group

The Teacher Tablet and TV Pilot group has been meeting to review the successes and hurdles to adopting the plan schoolwide.

Systems

A switch in the rear HS rack failed this month, a replacement is on order. It is not effective production currently. All Wireless Access Points have been upgraded to the new hardware purchased last summer. Working on deploying the new backbone switches now.

Staff ID

A staff ID has been developed and produced from Infinite Campus reports, and the associated badge printer has been setup and configured to print staff ID's. This took some additional effort entering data into Infinite Campus, but ultimately this data in IC will aide in future Staff PIMS reporting.

PIMS

Several PIMS reports were collected and submitted.

ISO

Participated and completed internal ISO audits with my team.
