

RCTC Report

March 2020

Term IV is off to a good start we are running Basic Welding, Intermediate Welding, Advanced Welding, Hydraulics II and Industrial Electricity I. This particular term many of our students have been sponsored by local area businesses as opposed to self-paying students. We are excited about this new development and attribute this influx to mail solicitations to area businesses over the past few months as well as advertisement in the Manufacturer & Business Association's "Business Magazine."
