JOC Board Report October 2025

October has been an exciting and productive month as we continue preparations for the 2025–2026 school year. Our Diggers and Dumpers event was a tremendous success, providing hundreds of middle school students the opportunity to explore career and technical education in an engaging, hands-on environment. I would like to extend my gratitude to all staff and students who helped make the event such a positive experience for our visiting schools.

Throughout the month, I have visited several of our 11 member districts and will continue these visits into the coming weeks. These meetings are vital in maintaining strong partnerships with our sending schools and ensuring that students and counselors are well-prepared for our November recruitment tours. We also hosted our first Guidance Counselor meeting earlier this month, where we had productive discussions around enrollment, scheduling, and student readiness. Together, we are aligning efforts to ensure a smooth and successful recruitment season.

Looking ahead, applications for the 2025–2026 school year will open on November 1, with a priority deadline of December 15. Our Student Ambassadors are preparing to assist with tours and outreach efforts during November, continuing to represent Erie County Technical School with pride and professionalism. These ongoing efforts continue to strengthen our communication, organization, and overall readiness as we enter one of the most exciting times of our school year, student recruitment season.

.Respectfully submitted,

Brittany Howell
